

# Living Covers Planted After 2021 Harvest of Corn (Percent)

## Living Cover Planted 2021

### Corn Harvest

Crop acres calculated from  
2021 USDA National  
Agriculture Statistics Service  
(NASS) Cropland Data Layer

Windshield surveys were conducted no sooner than 10 days after the first predicted period of 3 consecutive daytime temperatures above 40° F, and therefore do not represent field conditions outside of that time frame. For more information about transect surveys see:
